

## BRILLIANCE LED GU10 Dimmer Compatibility List

Primsal has been committed to conducting extensive dimmer compatibility testing to ensure that our GU10 lamps are compatible with the largest variety of dimmers on the Australian market. Below is a list of dimmers that our 5w GU10 is compatible with. We are confident that our lamp is also compatible with an extended variety of worldwide dimmers even if they are not listed.

*The above information should be used as a guide only. Actual outcomes may vary.  
Primsal reserves the right to update and change this information from time to time.*

**Test Conditions:** Each dimmer/lamp combination has been tested for compatibility under usual conditions. Signs such as any level of flickering, low level buzzing noise and lamp not operating would constitute a failure of compatibility. Conducted under normal ambient temperatures.
